SUMMARY

With direction from the Board of County Commissioners (Board), Parks staff has worked with GIS staff to develop a comprehensive map of recreation spaces in the County. The online map is fully interactive with the ability to utilize numerous layers and filters.

The map includes parks, trails, open spaces, swimming pools, schools, recreation centers, and golf courses. Filter tools allow users to sort recreation spaces based on various attributes, type, and public access. Additionally, users can utilize the distance filter to visualize recreation spaces within a certain distance of a location.

DISCUSSION

Staff is available to demonstrate the functionality of the map, discuss future updates, and for technical assistance as needed by the Board. Hard copies of maps can be produced upon request.
